

Modernization Financing

Improve performance now. Pay over time.

Schindler now makes it easier than ever to realize the economic benefits of a modernized, more efficient elevator system, while avoiding a large up-front investment.

Through special arrangements with leading commercial banks, Schindler provides a convenient way to finance a complete Schindler modernization at attractive and competitive rates, for periods of two to seven years or more.

It means you can substantially improve the performance and dependability of your equipment immediately — and keep tenants satisfied — while preserving your capital for other needs.

With Schindler's favorable financing terms, it can be practical to undertake more extensive modernizations — or to modernize more equipment — than would be possible if you were funding it all from your available capital. Or, it may become feasible to upgrade your equipment all at once, rather than phase in your modernization over a period of years.

Modernization financing options. Reliable and moving results.

Don't wait to modernize

With Schindler modernization financing, you can increase the value and appearance of your older elevators now. Whether you choose improvements to door operation, ride quality, safety upgrades, or aesthetic improvements to update the appearance of your older elevators, you don't have to plan for an expensive capital outlay. You can do it now quickly and easily with Schindler modernization financing.

Schindler simplifies it all

With Schindler, financing your modernization is surprisingly fast and easy. Schindler's financing representative will coordinate everything with the lending bank. About all you have to do is furnish the necessary financial information, most of which you probably have available already. To put your mind at ease, all your financial information goes direct from you to the lending institution to streamline the process and maintain confidentiality. You will typically have a qualification decision and quote in about two business days. Decisions regarding financing qualifications are made by participating lending institutions.

Coordinated with your Schindler maintenance

For easier management and administration — and to help protect your modernization investment — Schindler will design and implement a new maintenance schedule for your modernized equipment. This new maintenance contract will run for the duration of your financing period, or longer. It means that your upgraded elevators will be expertly serviced and maintained by Schindler at all times.

Available for all Schindler modernizations

This opportunity for convenient financing is available for all Schindler elevator and escalator modernizations. This includes custom modernizations as well as pre-designed solutions such as the Schindler Miconic® HXpress (hydraulic) and Miconic® TXpress (traction) modernization systems.
